t shows most common CPT codes summarized by visit type. t allows comparision of 2 time periods; shows coding level	 Shows average LOS of inidivudal faculty member for new and established visits, with side-by-side comparison to peers. Can also look at change in distribution of coding levels over time, by individual, DEP, CC or Division. Option 2: Provider View: wRVUS from Ambulatory Visits Shows wRVU volume and coding level by faculty, option to include visits with trainees and/or APPs Option 3: Total wRVUs from Ambulatory Visits Shows wRVU volume and coding level by division, cost center, DEP or by individual or groups of providers. Data is presented in monthly
t allows comparision of 2 time periods; shows coding level	established visits, with side-by-side comparison to peers. Can also look at change in distribution of coding levels over time, by individual, DEP, CC or Division. Option 2: Provider View: wRVUS from Ambulatory Visits Shows wRVU volume and coding level by faculty, option to include visits with trainees and/or APPs Option 3: Total wRVUs from Ambulatory Visits Shows wRVU volume and coding level by division, cost center, DEP or by individual or groups of providers. Data is presented in monthly
	Shows wRVU volume and coding level by faculty, option to include visits with trainees and/or APPs Option 3: Total wRVUs from Ambulatory Visits Shows wRVU volume and coding level by division, cost center, DEP or by individual or groups of providers. Data is presented in monthly
	Shows wRVU volume and coding level by division, cost center, DEP or by individual or groups of providers. Data is presented in monthly
	totals with the ability to see change in values over specified timeframe.
JMMARY - ALL CODES	Not available.
: shows summary by CPT codes, along with units, wRVU and es for the chosen division/cost center/DEP/time period	Not available as displayed in DOMBO. However, there is a CPT code filter that you could use in most reports that allows you to see volume and wRVUs by CPT code if interested. For example, in Total Visits you could filter by 99205 and see all of the 99205s by month and total over specified time. Same for Amb rvu reports and Procedure reports.
t Setting report	Option 1: Provider Visit Analytics Tool (VAT)
shows both total visit information and total wRVU by cost	Report shows visit total for the selected period.
by month.	Option 2: Total wRVUs by Ambulator Visit Report
	Use the visit type filter, choose your visit type (e.g, new patient, est patient, etc) and see the total wRVUs tied to that visit type.
report	Option 1: Provider View: Total Visits by Visit Type
data by cost center, DEP, Patient Encounter CSN ID, Visit Date, me, Visit Provider and Visit Type	Shows visit volume and visit type by faculty, option to include visits with trainees and/or APPs. In the PVAT, you can also see a lot of visit detail for individual providers. For example, totals by session/day,
	shows both total visit information and total wRVU by cost by month. report data by cost center, DEP, Patient Encounter CSN ID, Visit Date,

DOMBO vs PRISM User Guide

QUESTION	DOMBO	PRISM
		Option 2: Total Appointments and Visits Shows visit volume and visit type by division, cost center, DEP or by individual or groups of providers. You can also filter by a variety of other factors if interested. For example, if you only wanted to see visit detail for a particular CPT code, visit type, provider type, etc yuou can do that.
lf you want Shared visits	Not available on DOMBO	Provider Visit Analytics Tool (VAT) wRVU actuals include shared visit information
lf you want Open Encounter information	Not available on DOMBO	Not available on PRISM
lf you want Video Visits data	No specific Video Visit report	Option 1: Total Appointments and Visits report includes Visit Group filter to select Video or non video visist, report shows video visit visit count
	But user can run PB HB DETAIL report and filter for data where Modifier = GT	Option 2: Total wRVUs from Ambulatory Visits report includes Visit Group filter to select Video or non video visist, report shows video visit wRVU
If you want Performing Provider	Part of PB HB SUMMARY and PB HB DETAIL in DOMBONext	Total wRVUs from Ambulatory Visits
information	Users can choose to filter or display informtion by either billing provider or performing provider	Performing provider information is embedded in the report, but cannot easily cross reference corresponding billing and provider activity. This is true for most PRISM reports. You can't see how billing and performing correspond but you can look at data by performing vs billing for most reports.
If you want overall division productivity	Available in DOMBO. Not available in DOMBONext - Service Chief Dashboard will be sunsetShows individual provider and overall division wRVU productivity vs. Target.	Provider View: Total wRVUs with Target. Shows how faculty are doing compared to their target. Does not show how well division is doing compared to total division target. (This report is currently being amended to provide this information.) Receives cFTE information from the cFTE portal. Also, the Division, Cost Center, DEP Visit Analytics tool (for those who don't have procedure data) provides a variety of data at the Division level.
If you want physician productivity	Not available in DOMBONext - Physician Dashboard will be sunset	Provider Visit Analytics Tool (VAT) Shows how a faculty member is doing compared to target and compared to others in the Division. Receives cFTE information from the cFTE portal. The PVAT doesn't let you see how you are doing compared to target with a comparison to others in the Division. There are some metrics, however, that compare the indiv physician to the Division overall. Other aspects of productivity are included in the PVAT - completed sessions, etc. and other wRVU related metrics.
If you want inpatient perfromance metrics	Not available on DOMBO	Inpatient Operations shows inpatient team census, note volume, monthly wRVUs, and initial consult trends
If you want data based on a specific date range	wRVUs are displayed by Post Date	wRVUs are displayed by Date of Service
